

# UPSTAIRS AT THE GATEHOUSE

## GRID LOAD BEARING

**The grid will take 660 Kilos spread evenly over the total grid.**

**This 660 must include the weight of the grid itself (approx. 50 Kilos) plus the audio speakers (approx. 150 kilos) and the video projector (35 kilos).**

**This leaves 425 kilos to account for whichever in-house lanterns are used and any additional kit brought in by visiting companies.**

### Lantern Weights

Parcan – 3.5 Kilos X 20 = 70kilos

Tiatro Profile – 6 Kilos X2 = 12kilos

Patt 743 (223) – 9 Kilos X 16 = 144kilos

Source 4 PAR – 4 Kilos X2 = 8kilos

Source 4 Zoom – 9 kilos X 4 = 36kilos

Source 4 (50^&28^ ) – 7kilos X 10 = 70kilos

**Total weight of all the In-House**

**Lanterns.....340 kilos**

**There is no storage space within the venue so any lanterns not used must be left in the rig or hidden within the stage set.**

**If any additional equipment is brought into the venue please be aware there is no storage space available for the empty flight cases**

**June 2020**
